Professional Profile

Second-year Computer Science student with strong foundations in programming, problem-solving, and systems thinking. Experienced in Python, Java, C#, SQL, and web technologies through academic projects and independent work. Proven reliability and leadership from consistent part-time employment alongside full-time study. Seeking a Software Engineering Placement to apply technical skills in a real-world environment, contribute to production code, and develop professional engineering practices within an industry team

Education

University of Huddersfield - BSc (Hons) Computer Science 2024 – 25 First Year Modules: Computing Science and Mathematics – B Projects – A Computer Organisation and Architecture – C Computer Network Fundamentals – B Introduction to Procedural Programming – B Introduction to Object-Oriented Programming – A	University of Huddersfield - BSc (Hons) Computer Science 2025 – 26 Rational Databases and Web Integration - Operating Systems Algorithms and Data Structures Introduction to Artificial Intelligence Computational Mathematics 1 Team Project
--	---

Elliott Hudson College

2021 – 2023

Business Studies: D | Computer Science: C | Geography: C

The Ruth Gorse Academy

2016 – 2021

Mathematics: 5 | English Language & Literature: 6–5 | Italian: 7 | Combined Science: 5–4 | Geography: 5

Sport Studies: 5

Technical Skills

- **Languages:** Python, Java, C#, SQL
- **Web:** HTML, CSS
- **Concepts:** Object-Oriented Programming, basic data structures, problem decomposition
- **Tools:** VS Code, relational databases (SQL)

Professional Skills

- Team collaboration in academic and work environments
- Leadership and responsibility under pressure
- Strong time management balancing work, study, and projects
- Attention to detail in technical and operational tasks

Project Work

University Booking System (Group Project) *Java, Object-Oriented Programming, UML* January

- Designed and implemented a console-based booking system as part of a team project.
- Applied object-oriented principles including encapsulation, inheritance, and polymorphism.
- Collaborated using structured planning and task division to meet coursework deadlines.
- Improved understanding of system design, debugging, and teamwork in a software context.

Data Management Application *Python, SQL* November

- Built a small application to store, retrieve, and manipulate structured data using SQL.
- Implemented input validation and logical constraints to ensure data integrity.
- Gained experience translating real-world requirements into database-backed solutions.

Responsive Website Prototype *HTML, CSS* October

- Developed a multi-page responsive website focusing on clean layout and usability.
- Used semantic HTML and CSS styling to ensure accessibility and consistency.
- Strengthened understanding of front-end fundamentals and user-focused design.

Work Experience

Dönar Shack — Kitchen Assistant July 2023 – May 2024

- Prepared food items such as kebabs, fries, and fried chicken while maintaining hygiene standards.
- Took responsibility for closing duties, ensuring a clean and organised kitchen.
- Gained skills in time management, teamwork, and maintaining quality under pressure.

Sainsbury's — Night Shift Online Assistant September 2024 – Present

- Pick, pack, and prepare customer orders using handheld devices.
- Ensured stock quality and organisation, and maintained store standards overnight.
- Met strict deadlines while working independently and efficiently under pressure.
- Developed strong attention to detail, stamina, and work ethics.

Hobbies and Interests

I am actively involved in sports, with experience in competitive rowing, having been selected for an intensive training programme led by international coaches from the USA and Cambridge University, where I developed strong teamwork, discipline, and resilience while building lasting professional connections. I was also invited to attend the Henley Royal Regatta, gaining exposure to elite-level competition and professional sporting environments. Alongside this, I regularly play chess to strengthen strategic thinking and problem-solving skills, read for continuous self-development, and work on personal projects in my spare time to improve my technical ability by analysing and learning from mistakes.
